

Field Commander™

FIC-5 – Facility Information Center

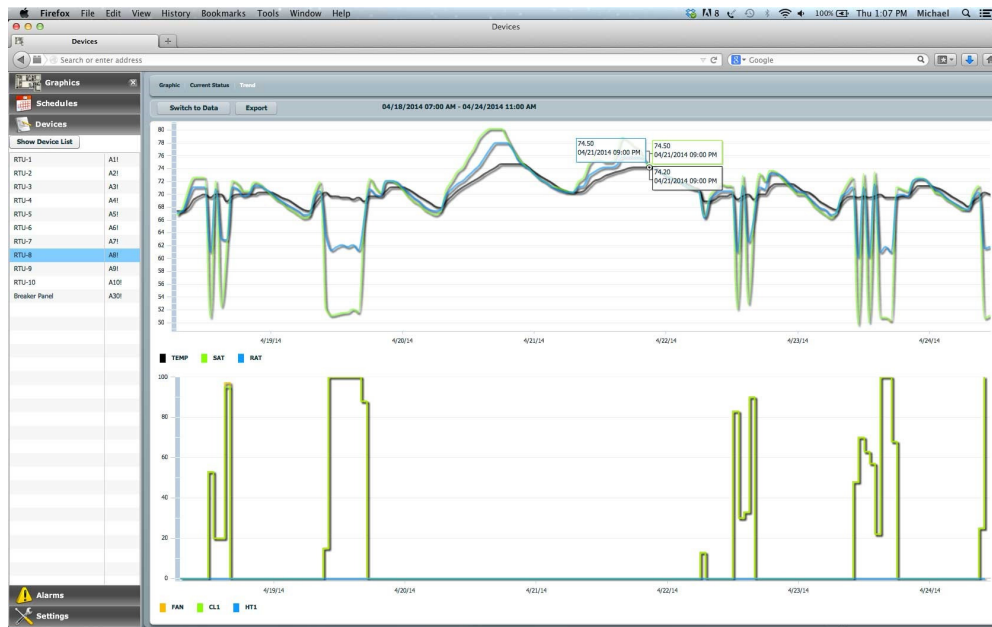

Overview

The Facility Information Center (FIC-5_XX) is an embedded local user interface and data repository for medium to large enterprises using the Field Commander Building Automation System. The base model hosts the Web Graphics interface for the local building making system graphics available via HTTP to remote users and to the enterprise level installation of PC Central. The base model will also include new Trend features - create charts that include multiple controller data points and automatically create separate graphs between analog and digital points.

Field Commander™
