

# Remote Controlled Emergency Circuit Breaker

The GHQRSPEL circuit breakers contains both a solenoid operated remote switching circuit and a manually operated thermal-magnetic circuit breaker. This Emergency Lighting Circuit Breaker complies with the 2008 National Electric Code; Section 700.12(F) for Sources of Power utilized in emergency lighting applications.

## Features, Functions and Benefits:

- **Left Pole:** Integral solenoid controlled contacts in series with thermal-magnetic circuit breaker pole.
- **Right Pole:** Standard thermal magnetic circuit breaker pole.
- Both Poles tied to same phase.
- Bolt-on line-side terminal.
- Cable connected load-side terminal.
- Status switch. Remote status and breaker status available from internal auxiliary switches.
- Bi-metal assembly for thermal overload protection.
- Fast acting short circuit protection.
- Arc-runner and arc-chute assembly for fast acting arc extinction.
- Three-position breaker handle: OFF, TRIP (Center), ON.
- Visual indication of the remotely operated contact's position (open, closed or trip).
- Remote override handle permits manual switching when control power is lost.
- 15 and 20 ampere breakers SWD, and HID rated.

## Operating Data:

Mechanism manually operated by external handle allowing ON, OFF and RESET operation. Handle assumes a center TRIP position after performing protective response.
