

Field Commander™

Manual Override Controller

Overview

The Manual Override Controller converts digital outputs from the unitary to closed contact outputs NO/NC/C. There are four override switches to override On, Off, and Auto (controlled by the Unitary – DO). The switch is a 3 pole maintained switch. It has an LED that shows if any of the outputs are not being controlled by the Unitary. Thus if any switch is in either the On or Off position, the LED will be lit. If all switches are in the Auto position, the LED is off. There are also 4 optional status LED, one for each output.

Manual Override Board	016-4112
Power Requirements:	24VAC, 10VA
Switching capability:	10A @ 120VAC 10A @ 240VAC/24DCC
Mounting:	Snap-Track
Dimensions:	3 1/4 " x 4 1/2 "

About H I Solutions

Since 1974 H I Solutions has provided innovative and cost-effective solutions for building management needs with computer-based automation systems for industrial, commercial, office, retail, educational, and healthcare facilities. Our distribution channels include a network of Independent Distributors, OEMs, and National Accounts. Headquartered outside Atlanta, Georgia, H I Solutions is committed to offering quality engineering and performance, low overall cost, and unparalleled customer service.
