

Field Commander™

View Panel

Overview

The View Panel is a wall-mounted, special purpose unitary controller which functions as a local operator interface. It can be used to view status and make control changes to any unitary connected to the panel. It contains a 16 line by 40-character alphanumeric backlit LCD display with a matrix touch screen. The text displayed is defined by the database loaded in the unitary. The display can show status for any unitary point connected to the same unitary network as the View Panel. Alarm/advisory messages on the View Panel may also be displayed and acknowledged by a local operator.

The panel includes an alarm buzzer output and three LED lights which may be controlled over the unitary network to provide local alarm or status display.

When not active, the display is turned off. Upon arrival of an alarm message or a touch, the panel display becomes active. With the first touch, the user defined opening screen is displayed. While the opening screen is displayed, any touch activates the first defined status display screen. Each display screen is a combination of alphanumeric text and status information. Selected text or refreshed point data may be linked to other displays, functions, or detail point status/control displays. Most screens have touch boxes displayed on the right side of the display to step to the next or previous line or selection point. There are also touch boxes to select the current item (highlighted in reverse video) and return to the previous screen display. Functions such as displaying messages, detail point status and control, or selection of a specific unitary also have other predefined boxes and touch areas on the display.

ViewPanel	016-6536
Display	16 lines, 40 characters per line
Touch Screen	Matrix
Auxiliary Inputs	4 (dry contact)
Maximum Nested Screens	9
Maximum screen definition Lines	200
Maximum refreshable points per screen	50
Auxiliary Outputs	3 LEDs 1 Audible alarm 4 Auxiliary Outputs (5VDC, 25mA/ch.)
Dimensions	6 1/2" x 9" x 2 1/2"
Power Requirements	External 24Vac, 20VA
Mounting options	Surface-mounted or recessed

About H I Solutions

Since 1974 H I Solutions has provided innovative and cost-effective solutions for building management needs with computer-based automation systems for industrial, commercial, office, retail, educational, and healthcare facilities. Our distribution channels include a network of Independent Distributors, OEM, and National Accounts. Headquartered outside Atlanta, Georgia, H I Solutions is committed to offering quality engineering and performance, low overall cost, and unparalleled customer service.
