

Field Commander™

View Panel

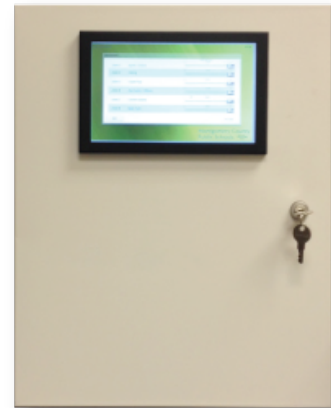

Overview

The View Panel is a wall-mounted local operator interface for the H I Solutions Building Automation System. It features an 9" touch screen with customizable graphical control pages. It can be used to view status and make control changes to any unitary on the building automation system.

When not active, the display is turned off. With a touch, the panel display becomes active. With the first touch, the user defined opening screen is displayed.

The View Panel comes mounted through the front face of one of two enclosure options, surface or flush-mount.
